CONCEPT

Water ATM, Water Vending Machine based on UPI QR Based Payment. It dispenses water bottles when payment is made on the UPI QR Code printed on it. You can install and forget. Just refill once all bottles are sold.

It can dispense 4 Types of Bottles or 4 separate drinks. Each drink needs to be set at a different price.

It also comes with a software that lets you know the current status of the machine, stock, inventory etc. The software is cloud hosted it has a subscription charge of Rs. 800/monthly.

It doesn't need internet because it has its own internet sim card . You can also configure it to connect with a wifi but wifi is not necessary.

Machine is manufactured on demand. Shipped in 15 days after payment. Shipping Charges extra depends on the location
